Right Plan. Right Products.
Right Partner.

Mosaic Technology

We identify the best technologies
to fit your goals and budget.

We deliver unique and creative technical solutions for your
business that align your IT solutions to your business objectives.

MOSAIC HAS OVER 30 YEARS OF EXPERIENCE PROVIDING BEST-IN-CLASS
TECHNOLOGY SOLUTIONS TO ORGANIZATIONS ACROSS THE GLOBE.

OUR SERVICES

Mosaic Technology can help you
strategically align your IT budget to meet
your business goals. From comprehensive
assessments and tailored design to
seamless implementation and ongoing
support, we offer the expertise and
partnerships necessary for long-term
success. Our vision for a secure, hybrid
data center integrates cost-effective and
operationally efficient models that scale
across multi-cloud and multi-site
environments. To achieve this, you need
the right plan, the right products, and the
right partner—Mosaic provides all three.

DISCOVERY SESSIONS

Understanding your business challenges
and goals is at the core of our customer-
focused approach. Our sales and technical
teams collaborate closely with you,
immersing themselves in your IT
environment and business objectives to
identify the most effective solutions tailored
to your needs.

BEST-IN-CLASS PARTNERS

Mosaic is a certified business partner of
industry-leading providers such as HP Inc.,
HPE, Dell EMC, Microsoft, Azure, O365,
ESET, Sophos, VMware, Intel, AMD,
CloudLink, Extreme Networks, Fortinet,
Lenovo, 10Zig, Silverpeak, Nutanix, Ruckus
Wireless, Thycotic, Quest, CenturyLink,
TierPoint, iLand, Zerto, Veeam, Zebra,
Honeywell, Western Digital, Winchester
Systems, and many more. These strategic
partnerships enable Mosaic to deliver
comprehensive, solution-driven IT services that
meet the diverse needs of our clients.

CONTINUED SERVICE AND SUPPORT

Mosaic can help you design a tailored solution
that meets your specific business needs. Our
team of industry experts works closely with you
to understand and define your requirements
and objectives. We handle the entire process—
from assessment and testing to proposal,
procurement, and implementation—saving you
both time and money. Additionally, we offer
comprehensive maintenance programs for your
legacy data center equipment. Choose from
flexible maintenance options, including
24/7/365 coverage, to ensure your systems run
smoothly year-round.

VIRTUALIZATION & HYBRID/PRIVATE/PUBLIC CLOUD

We design virtualization solutions that support desktops, remote workers, BYOD, storage, servers, backup, disaster recovery, and networking— including micro-segmentation. Virtualization, along with hybrid, private, and public cloud technologies, is driving transformative consolidation and optimization within IT infrastructure.

DATA ANALYTICS & MANAGEMENT

We help optimize your business and IT with solutions that deliver actionable insights from your data. This includes real-time wireline data, comprehensive visibility into all data in motion across your network, anomaly detection, and the ability to extract and analyze both real-time and historical business intelligence.

LOGISTICS

Mosaic ensures your order is delivered on time and exactly where you need it. We configure complete or partial systems to your specifications and offer full support from our technical and sales teams. Whether you require a custom build with multiple components, specific configuration, or tailored packaging, we handle it all—shipping, tracking, and providing implementation assistance upon arrival. We proudly serve customers across the United States and ship to over 40 countries worldwide.

MODERNIZE YOUR IT THROUGH DIGITAL TRANSFORMATION WITH COMPLETE, PROVEN SOLUTIONS FROM MOSAIC DESIGNED TO MEET YOUR BUSINESS, TECHNOLOGY, AND BUDGET REQUIREMENTS.

DIGITAL TRANSFORMATION

Drive your business transformation and strengthen your competitive edge. IT modernization is essential for driving innovation, improving customer experiences, and boosting reliability and security. Mosaic ensures you stay ahead with the right tools and solutions to fuel innovation and keep your business on the cutting edge.

MANAGED SERVICES

Monitoring, reporting, and remediation services are essential lifelines for organizations with limited IT resources. Our solutions help reduce the time internal teams spend on routine tasks, allowing them to focus on more strategic business initiatives.

DESKTOP VIRTUALIZATION

With virtual desktops, applications can be quickly upgraded, added, or removed. Security is centralized, and data management and protection become more streamlined. We will work with you to identify the best solutions tailored to your specific use case and business needs.

NETWORKING

We design and implement networking solutions that support LAN, WAN, WLAN, SD-LAN, and Virtual Networking, delivering optimized application performance, advanced analytics, and enhanced security.

PERFORMANCE OPTIMIZATION IN VIRTUAL ENVIRONMENTS

Virtual desktops and applications can create significant performance demands. Implementing virtual networking can deliver enhanced security through micro-segmentation. We conduct a thorough and independent assessment of your requirements to determine the optimal path for optimization. Our evaluation includes hosted, hybrid, and on-premise solutions, as well as converged and hyper-converged platforms. These options help reduce your infrastructure footprint, deliver automation, and minimize the time spent on support and administration.

BACKUP, DISASTER RECOVERY & BUSINESS CONTINUITY

We offer physical, virtual, hosted, and hybrid cloud solutions designed to support backup, disaster recovery, and business continuity. Our team will assess your recovery time objectives and recovery point objectives to recommend the best approach for your needs. Whether it's active/active or failover/failback data centers, backup and restoration, or rapidly spinning up to a secondary service during a disaster, we provide tailored solutions to ensure your business stays protected and resilient.

Assess / Transform / Optimize / Improve

COMPLIANCE

We will assist you in evaluating your current physical and virtual infrastructure to ensure your company meets compliance requirements and follows best practices in today's rapidly evolving IT landscape. Our services include comprehensive audit reviews and expert guidance to help you stay compliant and optimized.

NEXT GENERATION FIREWALL (NGFW) & SECURITY

We design and implement next-generation firewall (NGFW) solutions, including Firewall-as-a-Service (FWaaS), data loss prevention (DLP), antivirus/anti-malware, sandboxing, and data encryption. Additionally, many of our security and networking services are available as managed services, including monitoring, reporting, and remediation, to ensure continuous protection and optimized performance.

STORAGE CONSOLIDATION

Storage virtualization involves pooling physical storage from multiple network storage devices, often within a Storage Area Network (SAN), and presenting it as a single, easily managed storage device through a central console. When integrated into a hyperconverged platform, storage virtualization can drive significant efficiencies. We will work with you to assess your specific use case and recommend the best options to optimize your storage infrastructure.

STORAGE MANAGEMENT

Storage and data can be diverse, spanning multiple sites and cloud platforms. Effective management tools provide essential data insights, enabling you to assess costs and identify the ideal storage repository for your data. The best platform for your company depends on various factors, and we are here to help you navigate these options and recommend the solution that best aligns with your business needs.
